July 2022 - October 2024

Bachelor's in Mathematics

2020 - 2022

PROJECTS

Portfolio [↗](#)

Better Mortgage [↗](#)

This project is built using a modern tech stack that includes **Next.js with the App Router**, **Tailwind CSS** for styling, and **React Hooks** for state and lifecycle management. It's deployed on **Vercel**, ensuring fast performance and seamless scalability. Key features include smooth client-side routing, a functional **Mortgage Calculator** for loan estimates, and well-structured **Landing** and **About Us** pages. Navigation is handled using **Next.js Link components**, contributing to a responsive, SEO-friendly user experience.

Employee Management System [↗](#)

- Built a responsive Employee Management System using React and Tailwind CSS.
- Implemented authentication system with Node.js, storing sessions in localStorage.
- Managed employee data with JSON-based storage for CRUD operations.
- Designed a clean, user-friendly interface with focus on usability and responsive design.
- Applied state management in React for smooth data handling and updates.

Dashboard Web App [↗](#)

- Built a responsive dashboard with charts, cards, and task management features.
- Used TypeScript for type safety and better code organization.
- Styled with Tailwind CSS and ShadCN for a consistent UI.
- Added dark/light theme support.
